

I am a truck driver that has come to love the fact that because XMsatellite radio I can find out what the will be like hours before I get to a city . Plus trying to get through rush hour trafic in a semi truck is a lot easier getting instant traffic reports saves not only time but is also safer for all the public. This is a service I pay for.  
So I respectfully request that the FCC reject the NAB's petition 04-160.  
And let Americans chose what they want to listen to. We are suppose to be free to choose.
